Low Friction Rings

A complete assortment of low friction rings has been added to the Rutgerson product range. Low friction rings provide a good alternative to blocks in most applications where the line movements are minimal and the loads are high. For example back-stays, reefing points, jibs' sheet leads and lazy jacks. Their versatility seems to have no limits on the boat. They are extremely resistant and strong. Both cost and weight is low compared to blocks. Plus, with no moving parts maintenance is zero.

Like all other products from Rutgerson the low friction rings are designed and produced in Marstrand, Sweden. The assortment consists of four sizes, all made of high strength aluminum with a durable and low friction hard coat anodizing in black.

These products are available for orders 1 January 2018.

Part No	Product description	Safe working load kg	Max rope diameter mm	Hole Ø mm
LFR10x07	Low Friction Ring 10x7	800	7	10
LFR15x10	Low Friction Ring 15x10	1600	10	15
LFR21x14	Low Friction Ring 21x14	3200	14	21
LFR25x17	Low Friction Ring 25x17	5200	17	25
