

Low Friction Rings

Rutgerson's super strong Low Friction Rings are now available in five different sizes, all made of a of high-strength aluminum with a special low friction hard coat anodizing which is extremely durable.

These rings are very useful onboard and provide an excellent light-weight alternative to blocks in most applications where the loads can be high, but the line movement is low, such as back-stays, reefing points, jibs' sheet leads and lazy jacks.

Like all other products from Rutgerson our Low Friction Rings are designed and produced in Marstrand, Sweden.

Part No	Product description	Safe working load [kg]	Max rope diameter [mm]	Hole Ø [mm]	Weight [gr]
LFR7x5	Low Friction Ring 7x5	400	5	7	1,8
LFR10x7	Low Friction Ring 10x7	800	7	10	5,0
LFR15x10	Low Friction Ring 15x10	1600	10	15	14,6
LFR21x14	Low Friction Ring 21x14	3200	14	21	40,0
LFR25x17	Low Friction Ring 25x17	5200	17	25	71,6
