## 1532-11-05E & 1527-11E

The Rutgerson Battcar solution has proven to be a winner for sailors on all oceans and in all environments. The Rutgerson Battcar has a unique design which requires minimum maintenance and makes the mainsail extremely easy to hoist and lower.

Now we launch two new models 1527-11E and 1532-11-05E, which have been developed to perfectly fit two Sparcraft mast profiles, S137 and S180. The S180 is the mast profile of the First 31.7 Beneteau boat model, that has a production of over 1000 units per year.

The product is made of high strength composite and stainless steel. The slot width (bolt/shackle) is 30mm.

Part no	Product description	Profile	Length / Stack height	Wheel Ø [mm]	Recommended fitting	Packed per
Pressure absorbing slide						
1527-11E	Pressure absorbing slide, 11mm, E-gate, 24mm wheels	11mm	55mm	24	1490, 1490B or Webbing	10

Part no	Product description	Profile	Length / Stack height	Wheel Ø [mm]	Adaptor material	Recommended Receptacle / Fitting	Approx. Push BL [kg]	Approx. Pull BL [kg]	Weight [g]	Packed per
Battcar 1530-xx-05 with M10 stainless steel thread
