

RUTGERSON

Rutgerson Super Ring removal tools manual - English

When it is necessary to remove a RutgerSON Super Ring from the sailcloth or canvas, please follow these instructions.

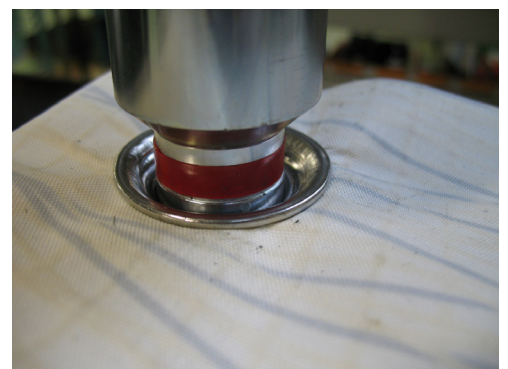

1. Place the ring with the liner part facing down towards the lower die (see picture).

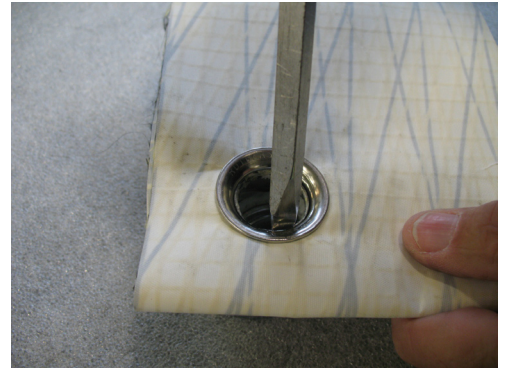

2. Place the punch on top of the ring with the concave gripping edge downwards.

3. Place the tool and cloth in the machine press and press down until the liner part shears free of the tooth part. Do not press to hard, where the red band should not go through the ring.

4. Use the support part with the sharp edge facing upwards to force the liner part off the cloth using a screwdriver or similar tool.

5. When the liner part is removed, use a pair of pliers to remove the remaining tooth part from the cloth.

6. The Super Ring has now been completely removed without any damage to the cloth. Just press in a new one, in the same hole!
